

Get a bigger view. A better view. A sharper view. Only with the new Welch Allyn MacroView™ Otoscope.

Get nearly a full view of
the tympanic membrane

The new Welch Allyn MacroView Otoscope will forever change the way you view the ear — without changing the way you work. This next-generation otoscope features advanced optics that increase magnification while giving you nearly a full view of the tympanic membrane — virtually eliminating the need for panning. What's more, with its easy-to-focus eyepiece, the MacroView allows for enhanced visualization to help you to see past wax, locate fluid behind the eardrum, and even perform exams without your glasses. The bottom line: MacroView gives you a bigger, better, sharper view of the ear — allowing you to perform everyday exams faster and more efficiently.

The Welch Allyn MacroView Otoscope gives you:

- Twice the field of view
- 30% greater magnification than a traditional otoscope
- Nearly a full view of the tympanic membrane
- Better clarity and definition of landmarks
- The ability to adjust focus for variable ear canal lengths or farsighted eyes
- Tip Grip for secure fastening of ear specula, along with ejection feature for disposal
