

KIOSK

The stand-alone Hearing Screening Tablet designed to be used unattended in pharmacies, physician offices, assisted living facilities, community events and more

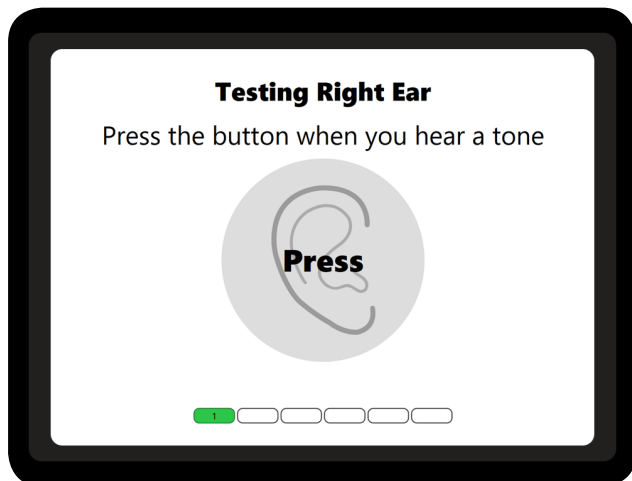

See Results as Customers Complete the Screenings

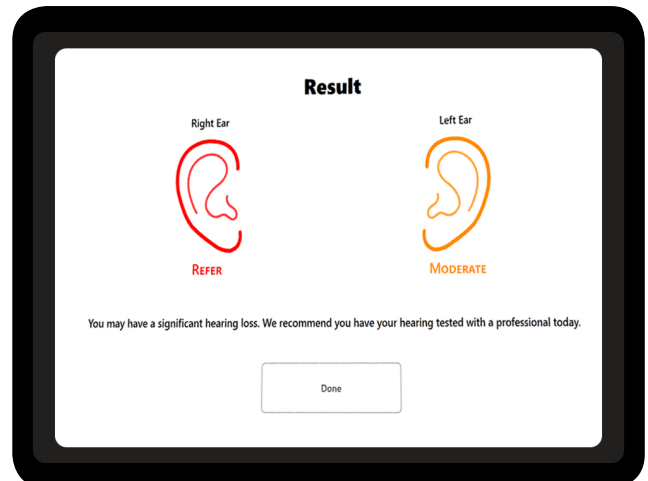

Add your logo to the home screen.

Customise preferences for your clinic

Big, easy to read instructions for patient to test their hearing

Log into your Kiosk software to see the patients results and contact info

Customer Focused Hearing Screening

Use a fast hearing screening designed to qualify a lead in a standalone environment. The entire process takes under 3 minutes and provides immediate customer hearing loss feedback

Suited for Home Testing

Home testing is becoming more important with at risk individuals staying home. Send LTE Tablets to your customers and view results in real time. Provide the services your community needs even in difficult times.

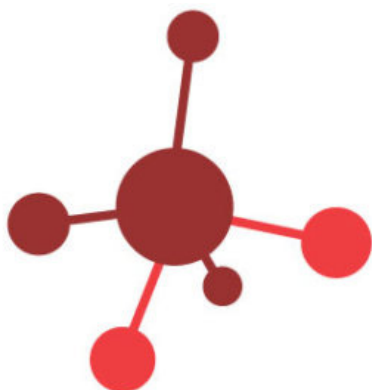

Cloud Based Results

MedRx Kiosk connects to the cloud for real time results. See leads, hearing results and analytics through our HearingBI service.

Built for Lead Generation

Kiosk has a looping patient interface with tutorial videos that make it perfectly suited for lead generation. Partner with physicians, optometrists, pharmacies or other businesses to provide hearing screenings and leads for your business.

Enterprise Ready

Kiosk in combination with the [HearingBI](#) service can accommodate thousands of Kiosks providing leads and analytics to entire organizations.
